SUMMARY

Hello! I'm Muhammad Ahmad, a dedicated Full Stack Developer from Faisalabad, Pakistan. With 2 years of experience, I'm skilled in building scalable and user-friendly applications. My expertise includes React.js, Next.js, and Node.js, and I've successfully developed projects ranging from e-commerce platforms to mobile applications. I thrive on challenges and am passionate about delivering impactful solutions

EXPERIENCE

Full-Stack Developer

Three Arrows

📅 06/2024 - Present 📍 Faisalabad, Pakistan

A company focused on developing web solutions and applications

- Web3 Trading Dashboard (React.js) : Built a real-time crypto trading platform integrating Web3 technologies, including wallet connectivity and live market data. Implemented charting and analytics features using external APIs.
- Full-Stack Voting System : Designed and implemented a secure and scalable voting system using React.js and Node.js. Features included user authentication, admin control, real-time result updates, and fraud prevention logic.
- Next.js Blog & Portfolio System : Created dynamic blog and portfolio pages using Next.js with SEO optimization, server-side rendering, and route-based code splitting for performance.
- API Development & Integration : Created RESTful APIs and integrated third-party services like payment gateways, geolocation, and external data providers
- Developed and maintained a robust backend system using Node.js and Express, following best practices in JavaScript and RESTful API design
- Actively engaged with potential customers as the lead developer, offering technical guidance and support to drive customer success, resulting in a 20% increase in product adoption
- Ensured high performance and responsiveness of applications by writing efficient, scalable code and leveraging MongoDB and Node.js optimization techniques
- Designed and implement RESTful APIs using Express.js for seamless integration with React.js frontend and third-party services

PROJECTS

Currency Exchanger

📅 01/2024 - 02/2024 📍 Faisalabad, Pakistan

A currency exchanger application developed for personal use

- Used React.js to create a responsive currency exchange website that integrated RESTful APIs for up-to-date currency data
- Enhanced user experience with dynamic features like real-time currency conversion and a seamless interface by using Tailwind CSS to create a modern, mobile-friendly user interface
- Produced a dependable and effective currency exchange platform by showcasing great front-end programming and API integration expertise

E-commerce Store

📅 02/2024 - 04/2024 📍 Faisalabad, Pakistan

An e-commerce store built for improved user experience and scalability

- Created a dynamic e-commerce platform using Next.js and MongoDB that offers a smooth shopping experience, server-side rendering, and optimum performance
- Utilized a MongoDB database for effective data administration, enabling features like shopping carts, product listings, and user authentication
- Developed a scalable and user-friendly online store with faster page loads and enhanced SEO using Next.js

Person Findr Application

📅 04/2024 - 06/2024 📍 Faisalabad, Pakistan

A mobile application designed for people searching and connection

- Developed a React Native mobile app using Firebase with secure login and user-friendly filtering features for real-time people search and connection
- Ensured a user-friendly and responsive experience
